- APPLYING LEAN INNOVATION IN YOUR DEFENSE ENGINEERING SOLUTIONS
- HOW ACQUISITION CAN KILL INNOVATION – OR HELP IT FLOURISH
- COMPETITION AND INNOVATION – THE SECRETS OF GETTING THE MOST OUT OF INDUSTRY

## INNOVATION FOR DEFENSE

### A 2 DAY COURSE

Invarius LLC's 2-day Innovation course can be tailored to your agency's needs. In 1980, the US Federal Government spent over 50% of worldwide research dollars, yet today it's less than 5% - with profound implications on our national security. Commercial innovation – powered by startup ecosystems and capital investment strategies – dominate today's innovation landscape. This course will help you understand the commercial innovation ecosystem as it compares to the Department of Defense and adapt your engineering and acquisition strategies to fully embrace innovation.

Glenn Colby is the founder and president of Invarius LLC. This dynamic, engaging course includes hands-on scenarios and workshop activities, bringing insights from his career including COO of a satellite startup, Director at a major defense contractor, Vice President of a small business, and over 25 years as a Navy civilian. Glenn's prior training includes NAVAIR, NAVSEA and Army organizations, major defense contractors, and commercial businesses.
